

The background of the slide is a collage of various financial market charts, including candlestick price bars and moving average lines, rendered in shades of blue and white. The charts are layered and semi-transparent, creating a complex, technical appearance. Overlaid on this background is the main title text in a large, bold, yellow font.

A Powerful Approach...

Agenda

Profiting with Pivot-Based Concepts

- Pivot Trend Analysis
 - Buy Support, Sell Resistance
- Pivot Width Analysis
 - Forecasting Price Behavior
- Introduction to Pivot Relationships
 - Higher Value Relationship
 - Lower Value Relationship
 - Inside Value Relationship

The background of the slide features a complex, blue-toned image of financial market data. It includes multiple overlapping line graphs, candlestick charts, and various technical indicators. Some text is visible on the charts, such as "Indexes - day, 5", "Indexes - day, 10", and percentage values like "78.60%" and "61.81%". The overall aesthetic is that of a professional financial analysis tool.

Pivot Trend Analysis

Buy Support in an Uptrend,
Sell Resistance in a Downtrend

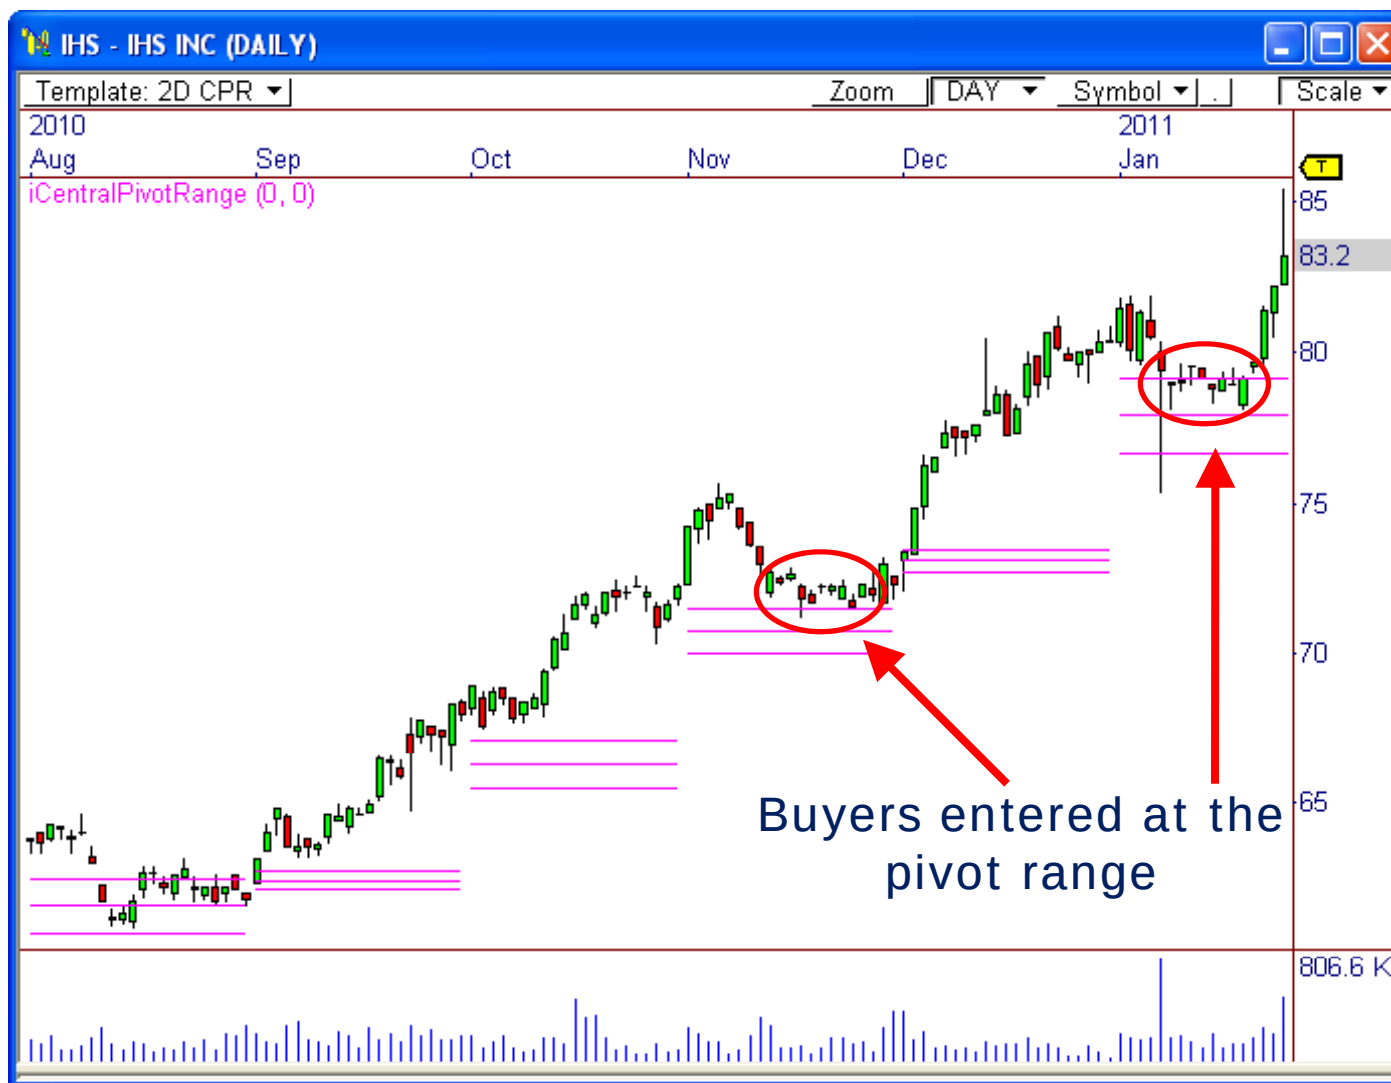

Pivot Trend Analysis

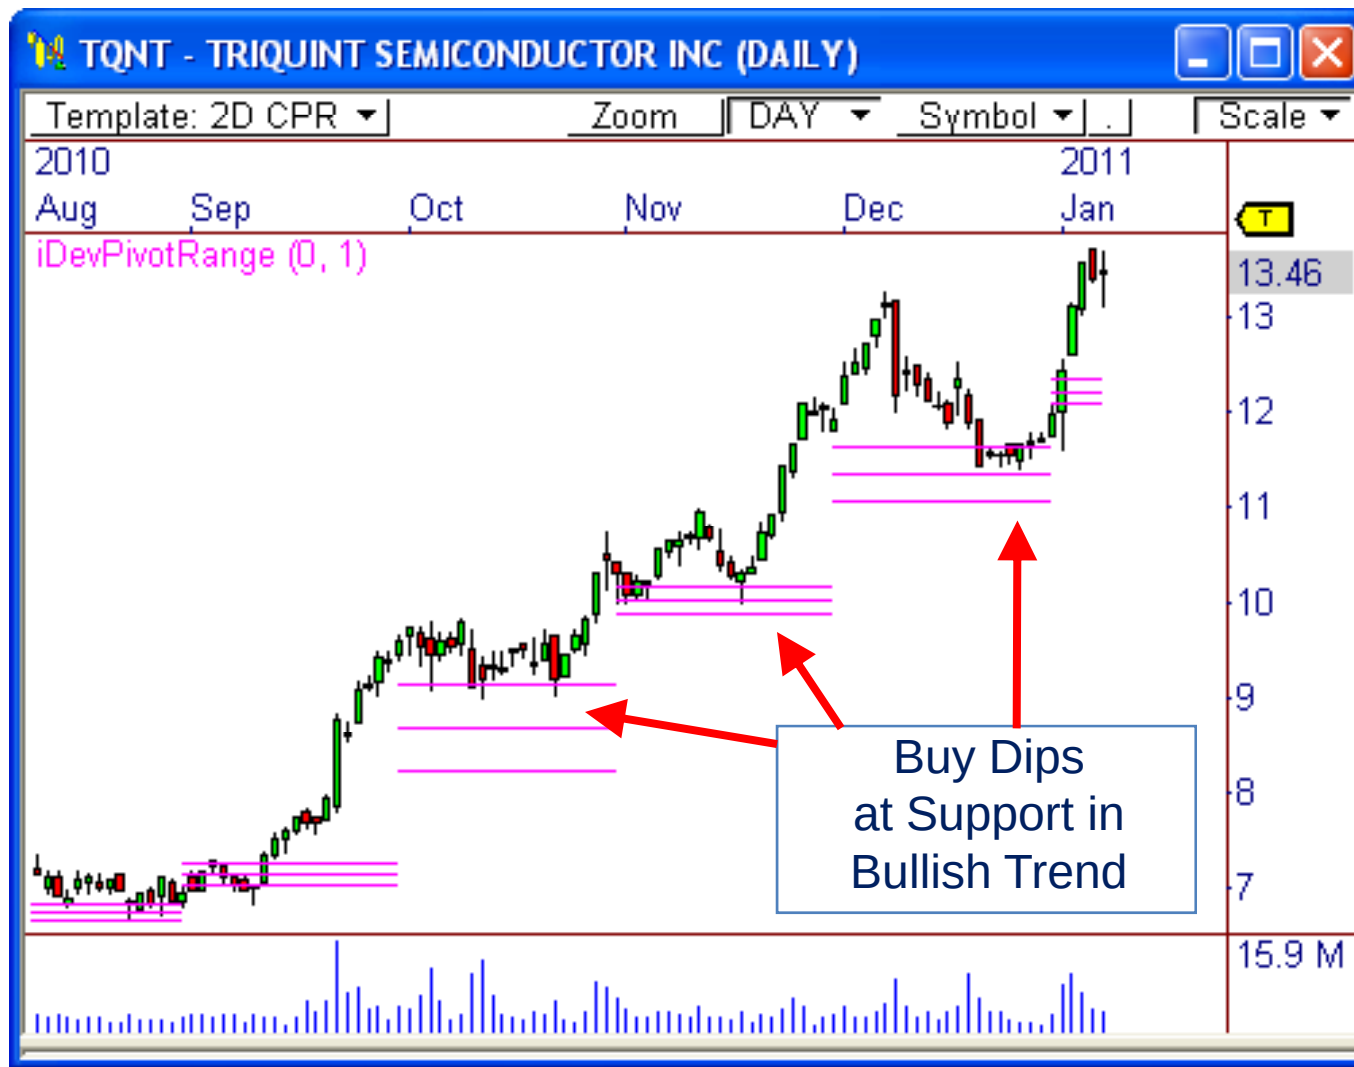

- Buy at support in a bull trend
- Sell at resistance in a bear trend
- Keeps you disciplined to the trend
- Certain pivots become “retired” during a trend
- Focus on higher probability reversals

Buy Support in a Bull Trend

Buy Support in a Bull Trend

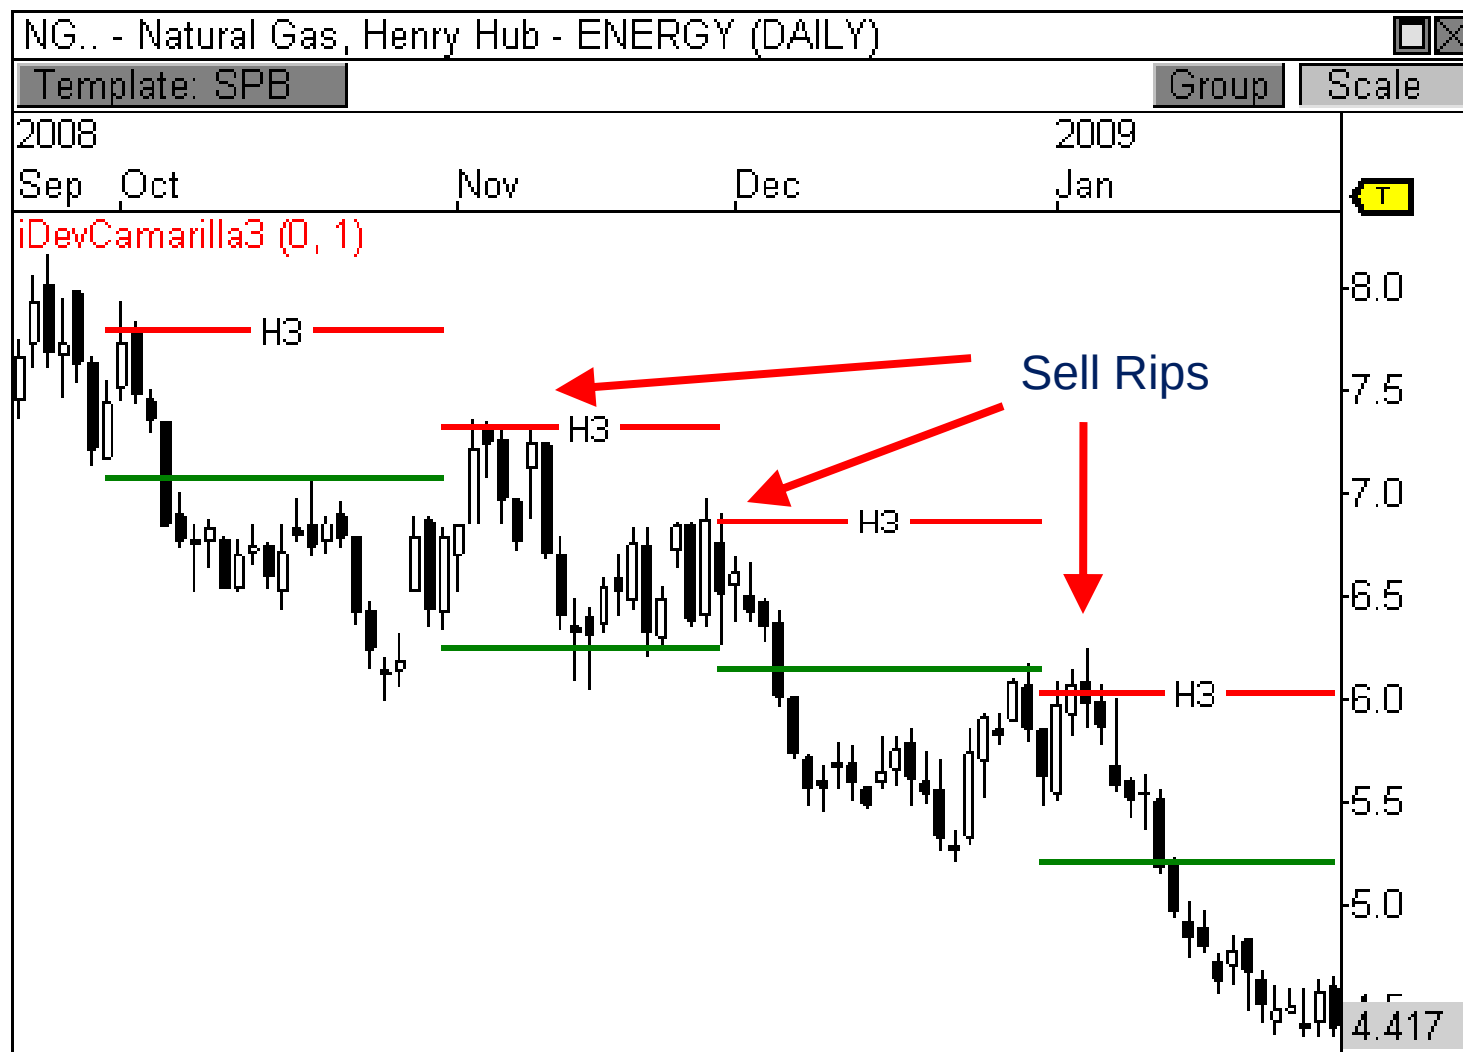

Sell Resistance in a Bear Trend

Sell Resistance in a Bear Trend

Sell Resistance in a Downtrend

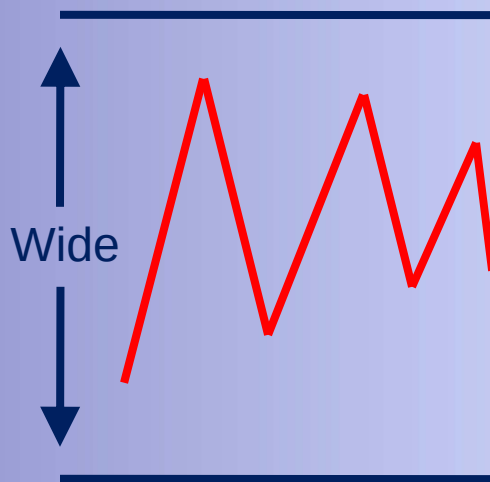

Buy into Morning Weakness

Pivot Width Analysis

Trading Range Behavior

Trending Behavior

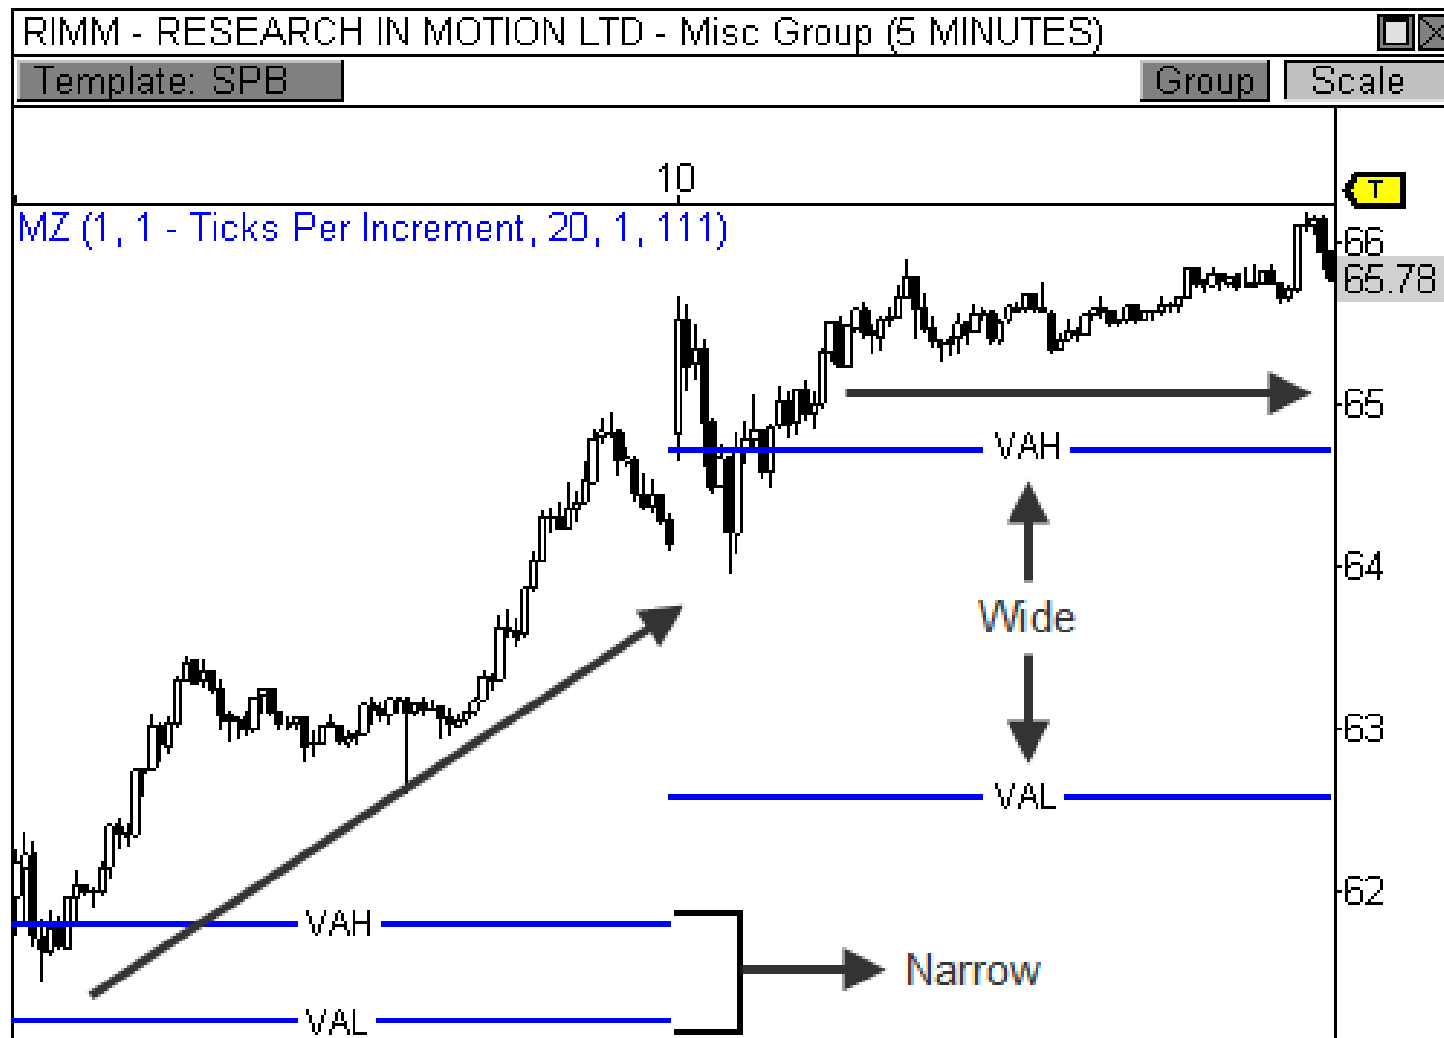

Forecasting with Pivot Width

- The price behavior of a prior period of time can help forecast the price behavior of an upcoming period of time
- An Unusually wide pivot range can forecast sideways trading
- An Unusually narrow pivot range can forecast trending and breakout markets
- Allows you to anticipate potential market behavior
- Allows you to choose which markets to trade

Research In Motion

Game Plans for Narrow/Wide Days

Sideways Markets

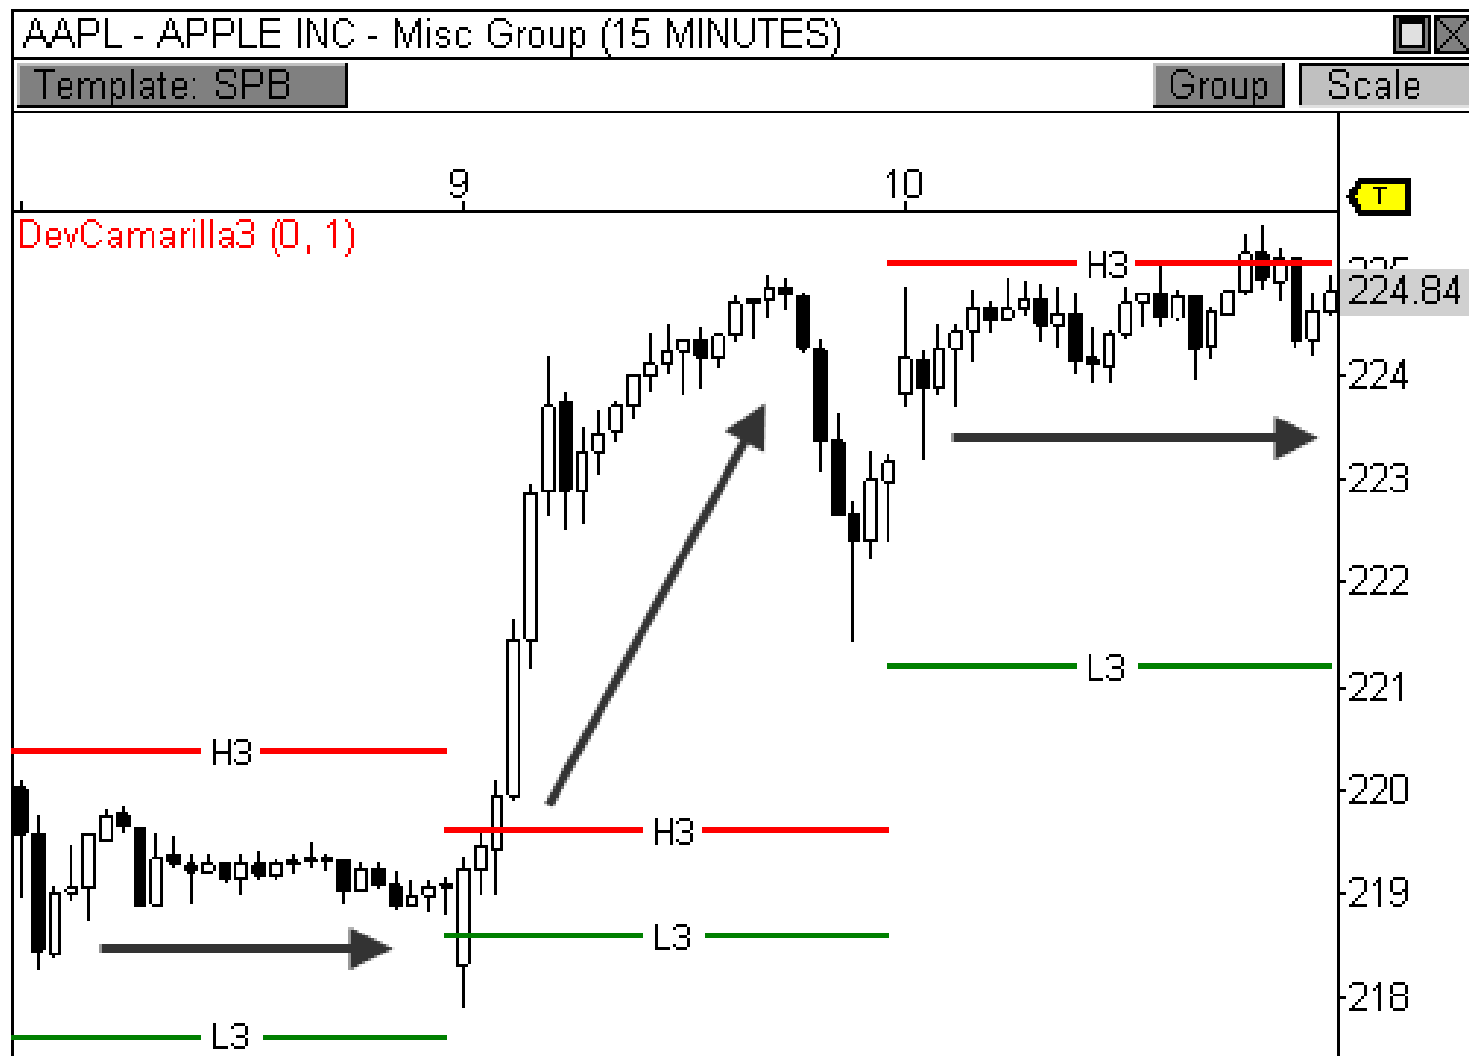

- Play Reversals
- Tight Stops
- Close Targets
- or Stand Aside

Trending Markets

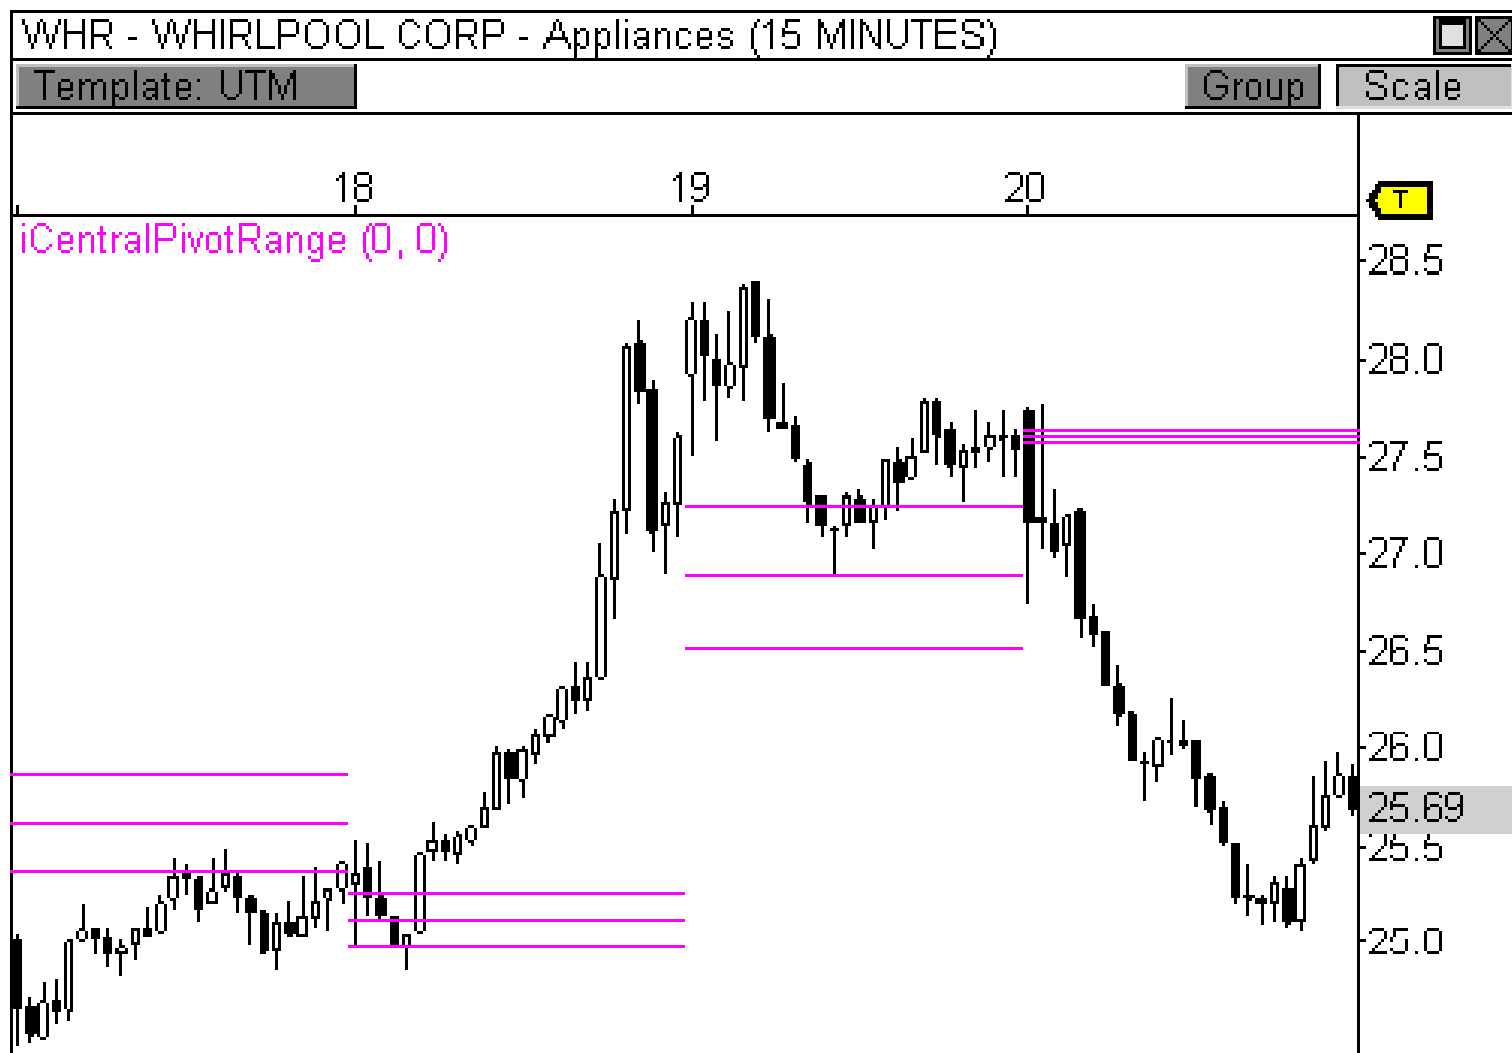

- Play Breakouts
- Loosen Stops
- Bigger Targets
- Look to be “In”

Narrow Ranges = Big Potential

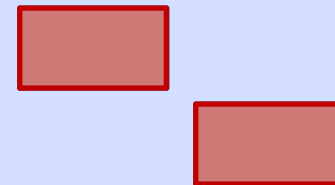

7 Pivot Range Relationships

Higher Value

Lower Value

Overlapping Higher Value

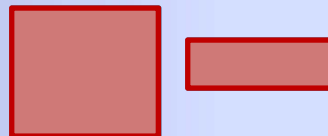

Overlapping Lower Value

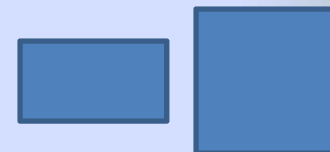

Unchanged Value

Inside Value

Outside Value

Why are Pivot Relationships Useful?

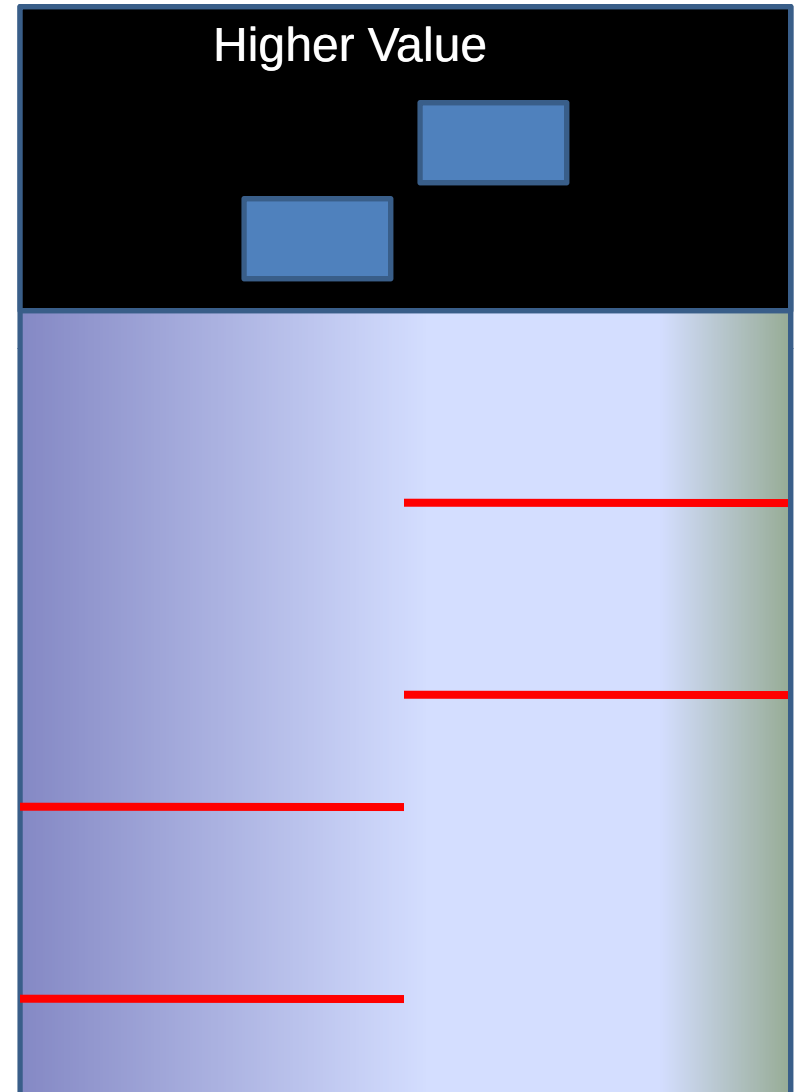

- Allow you to gauge market strength/weakness
- Allow you to anticipate potential price behavior
- Allow you to focus on the best trading candidates
- Keep you disciplined
- Force you to do your homework
- Allow you to plan your trades

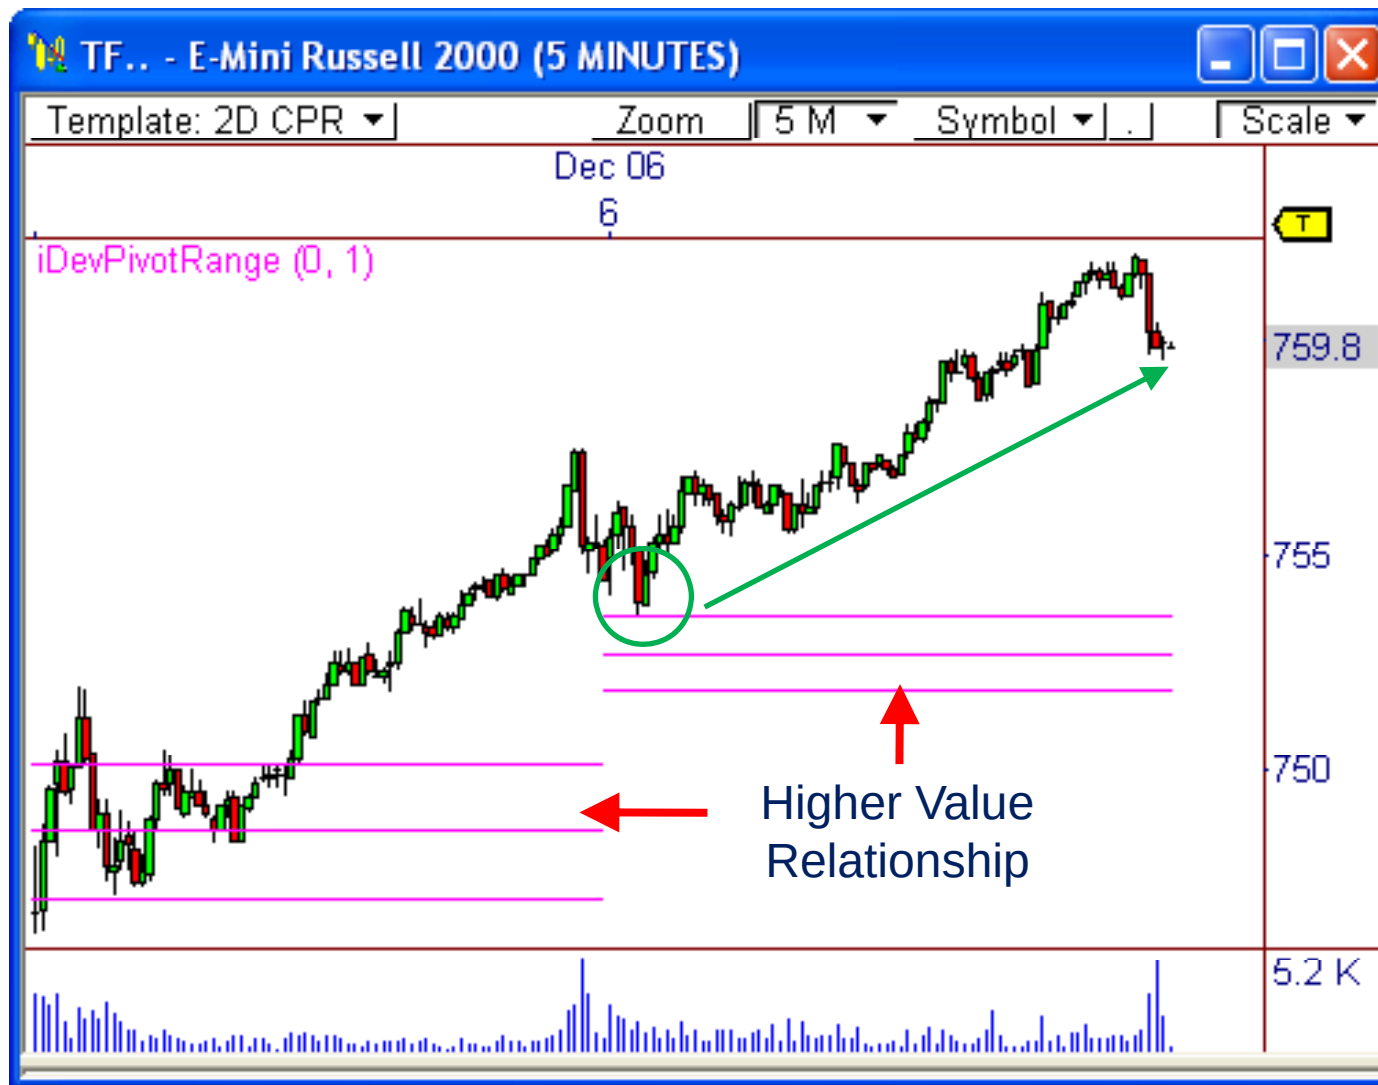

The Higher Value Relationship

Higher Value

- Most bullish relationship
- Occurs when the pivot range is completely higher than the prior session's pivot range
- Look to buy at support in a bullish trend
- Buy into weakness, sell at a new high within the trend

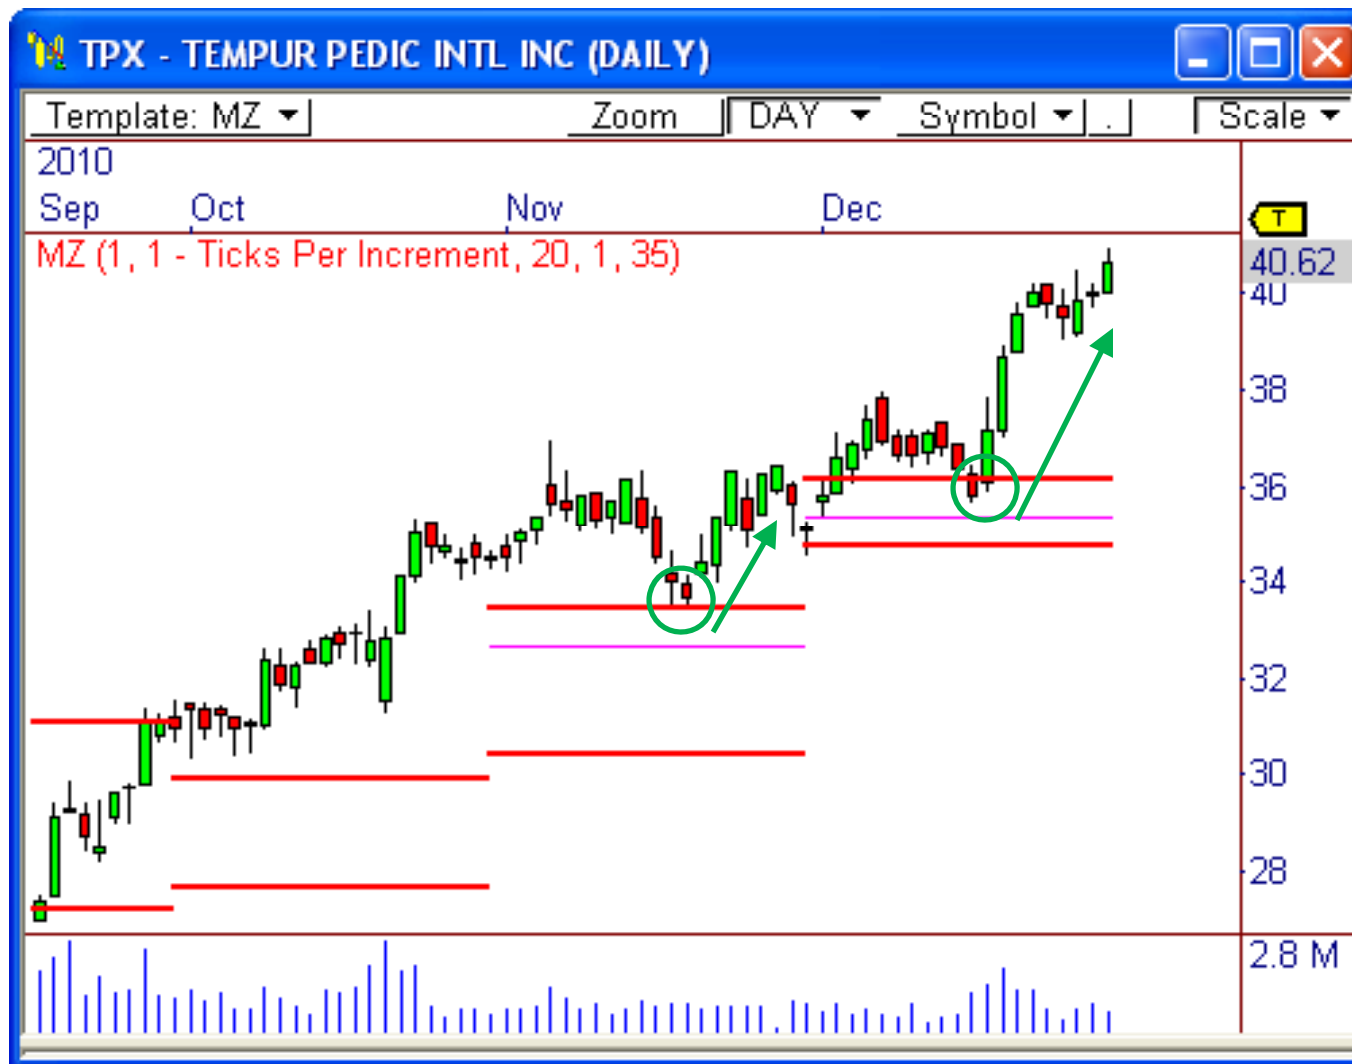

Higher Value Relationship

Buy at Support

Higher Value: Buy at Support

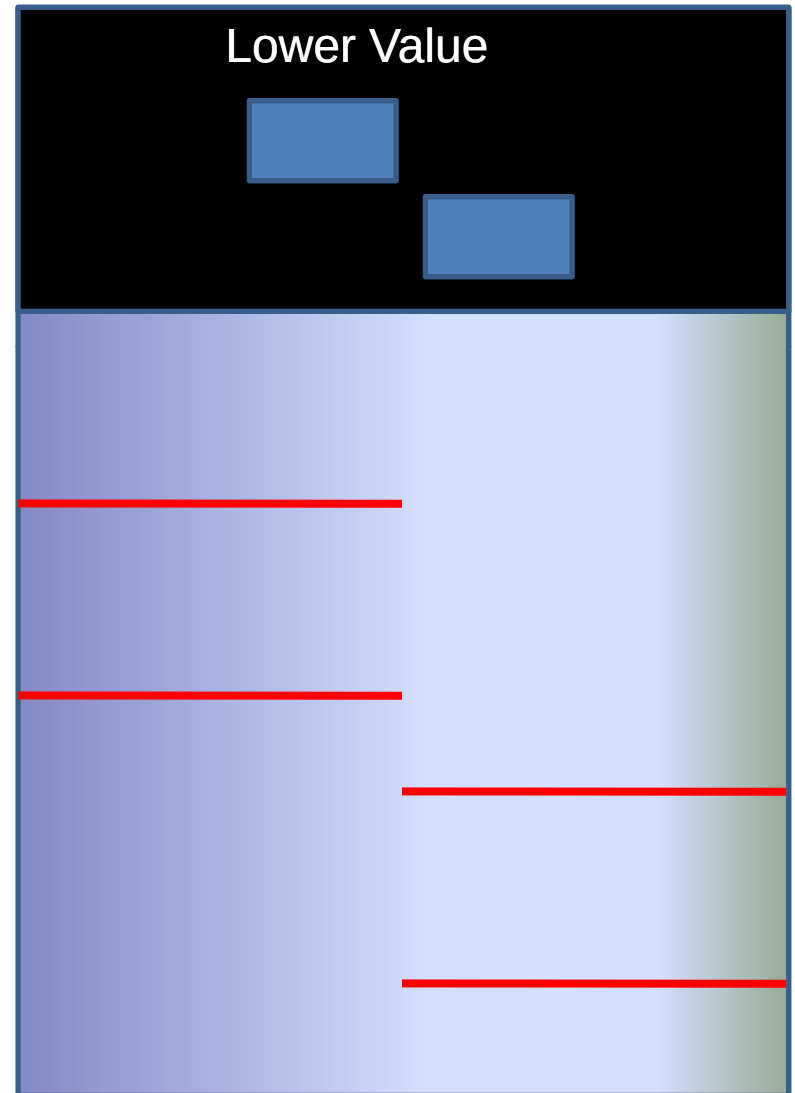

Failed Higher Value

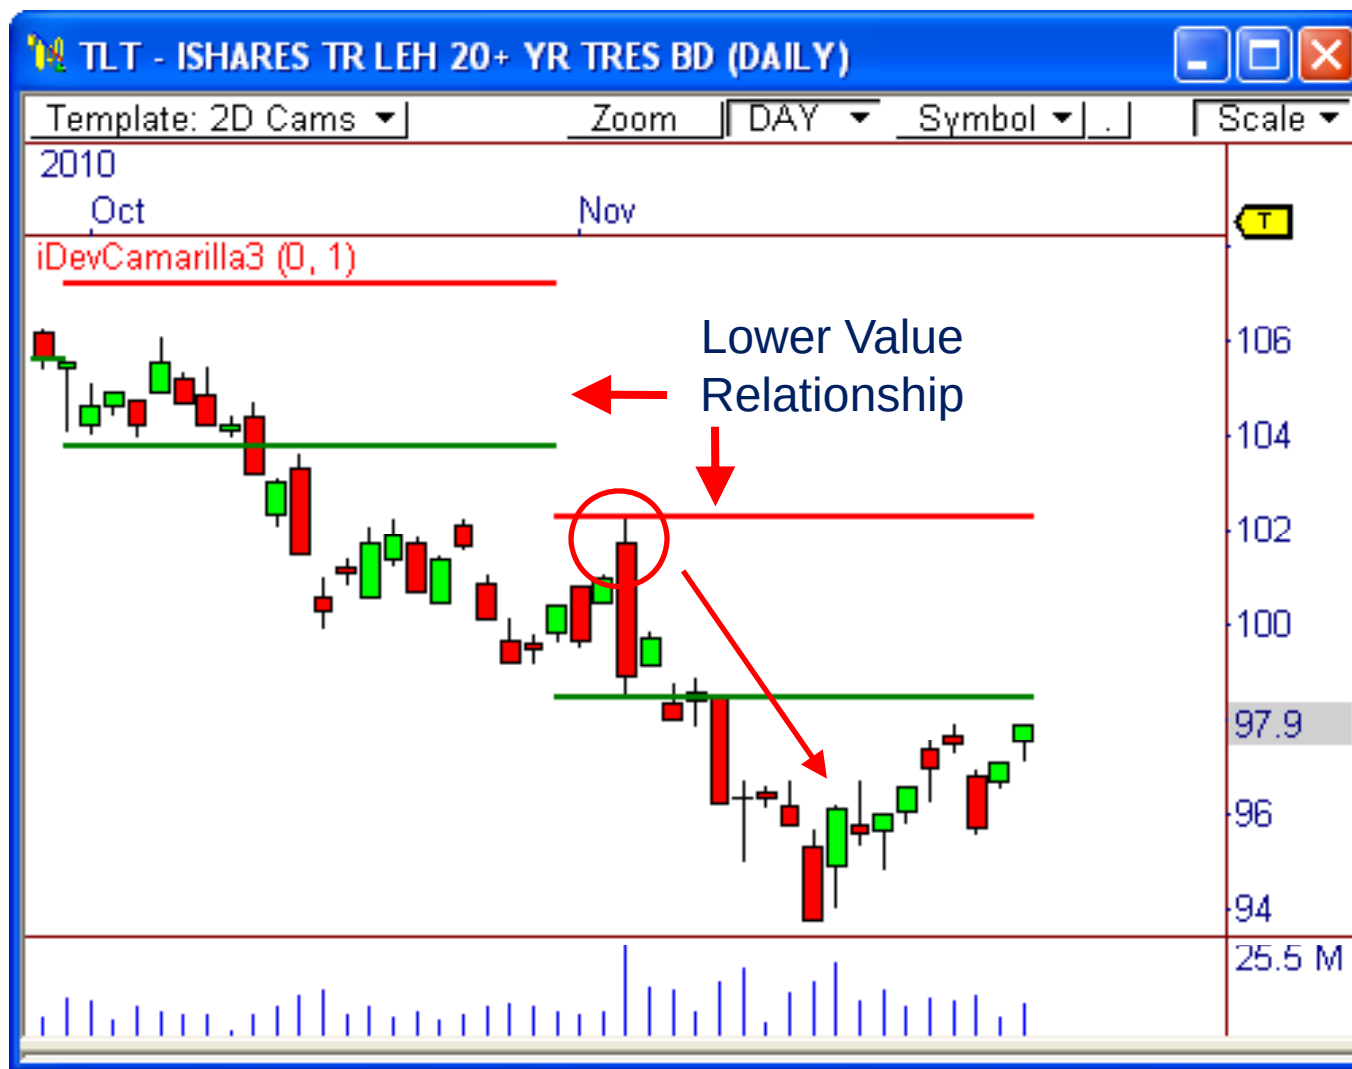

The Lower Value Relationship

Lower Value

- Most bearish relationship
- Occurs when the range is completely lower than the prior range
- Look to sell at resistance in a downtrend
- Sell into strength, with a target of reaching a new low within bear trend

Lower Value Relationship

Lower Value Relationship

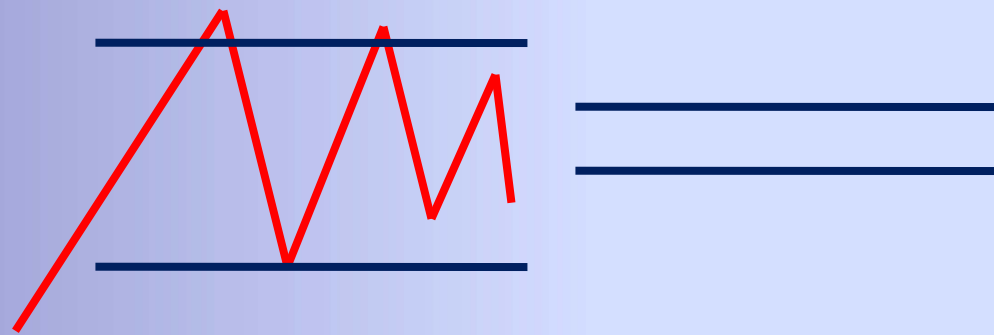

Sell at Resistance

The Inside Value Relationship

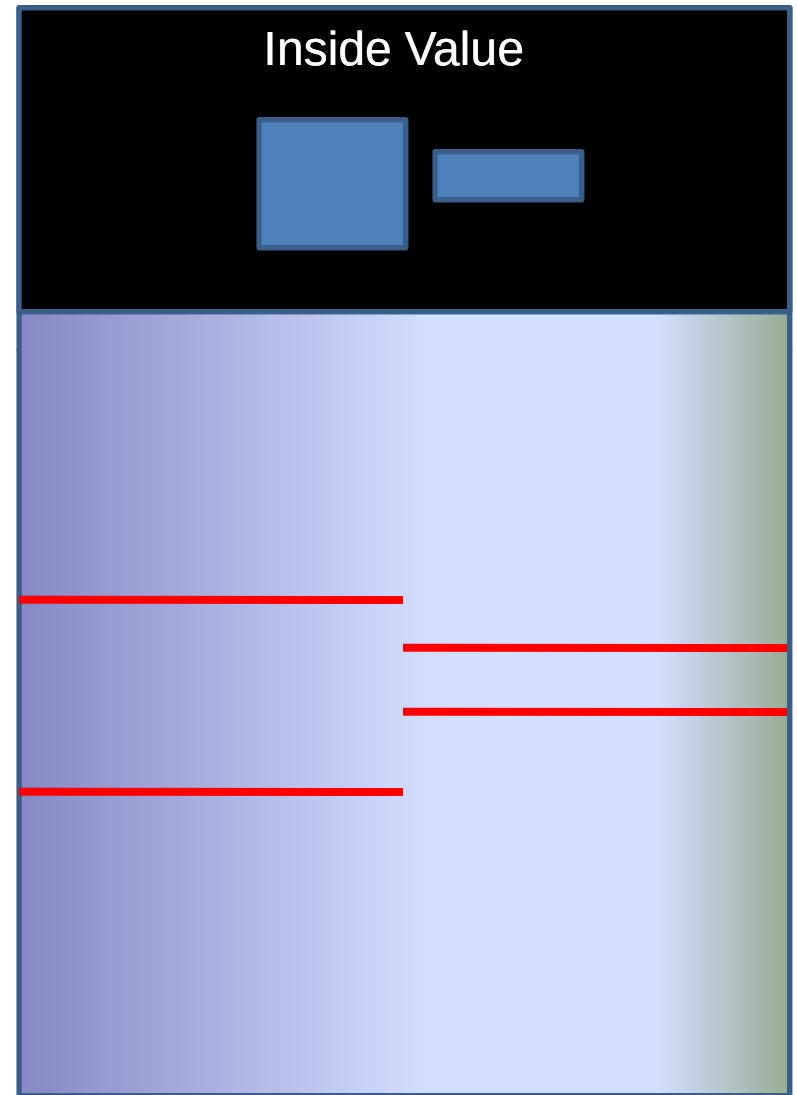

Identify the most explosive breakout days

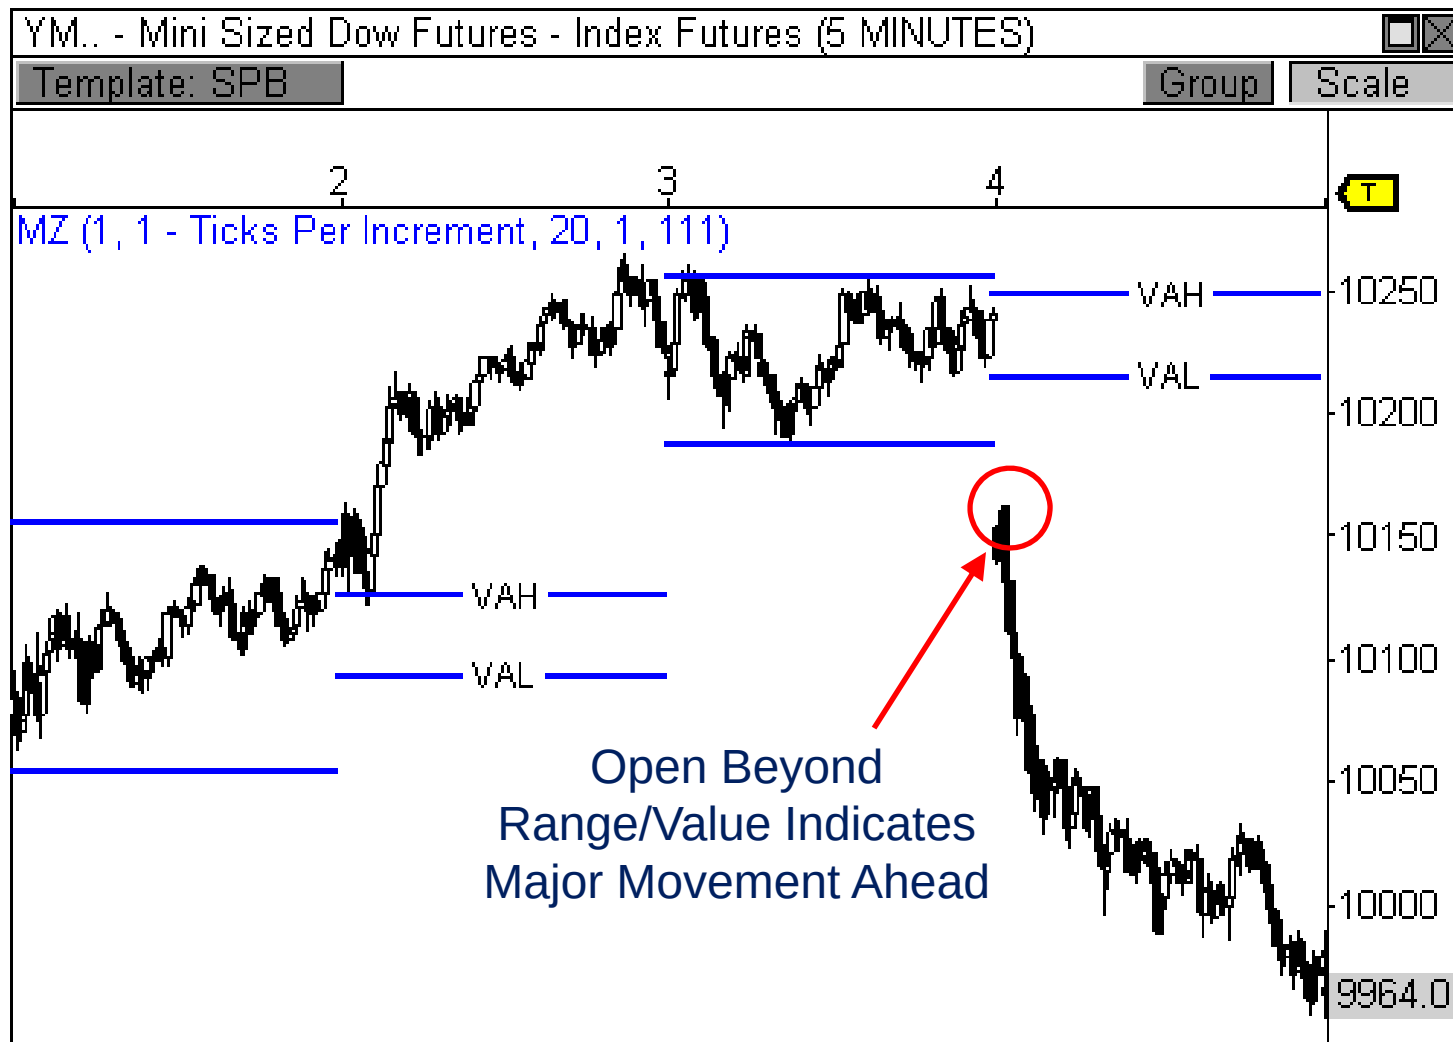

Inside Value Relationship

Inside Value

- Most explosive relationship
- Occurs when current range is completely inside prior range
- Look to trade a breakout from price range
- Initiative participants step in and aggressively push price to new value
- Loosen stops, trade for bigger profits
- Trend morning, or trend day scenario may occur

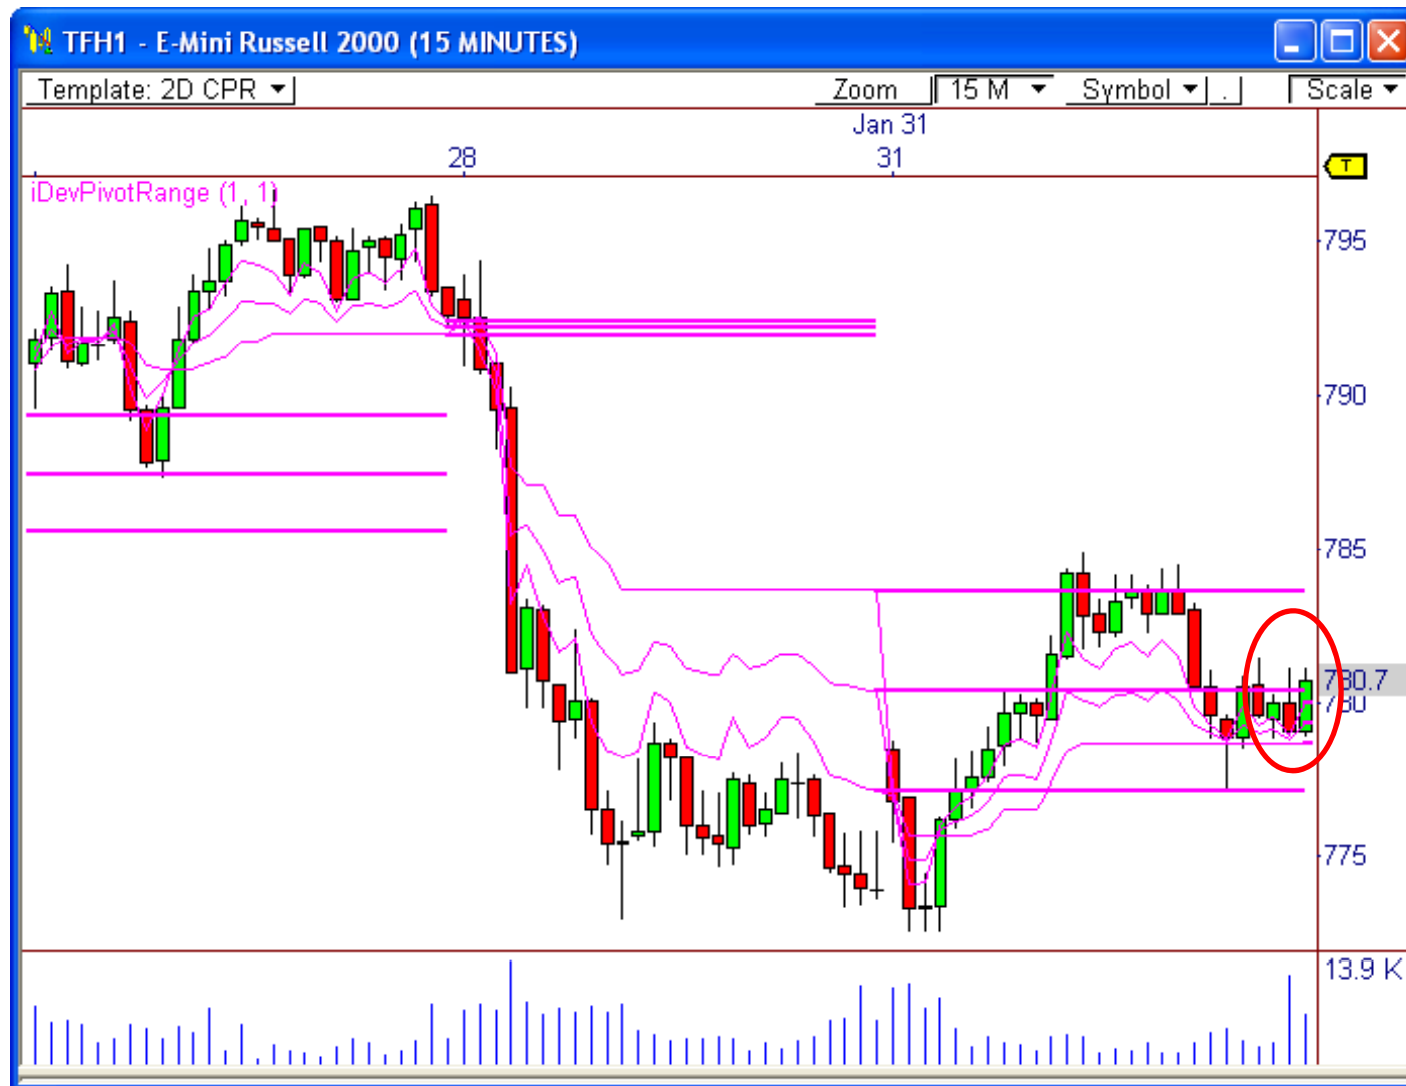

Mini Sized Dow

Identifying an Inside Value Setup

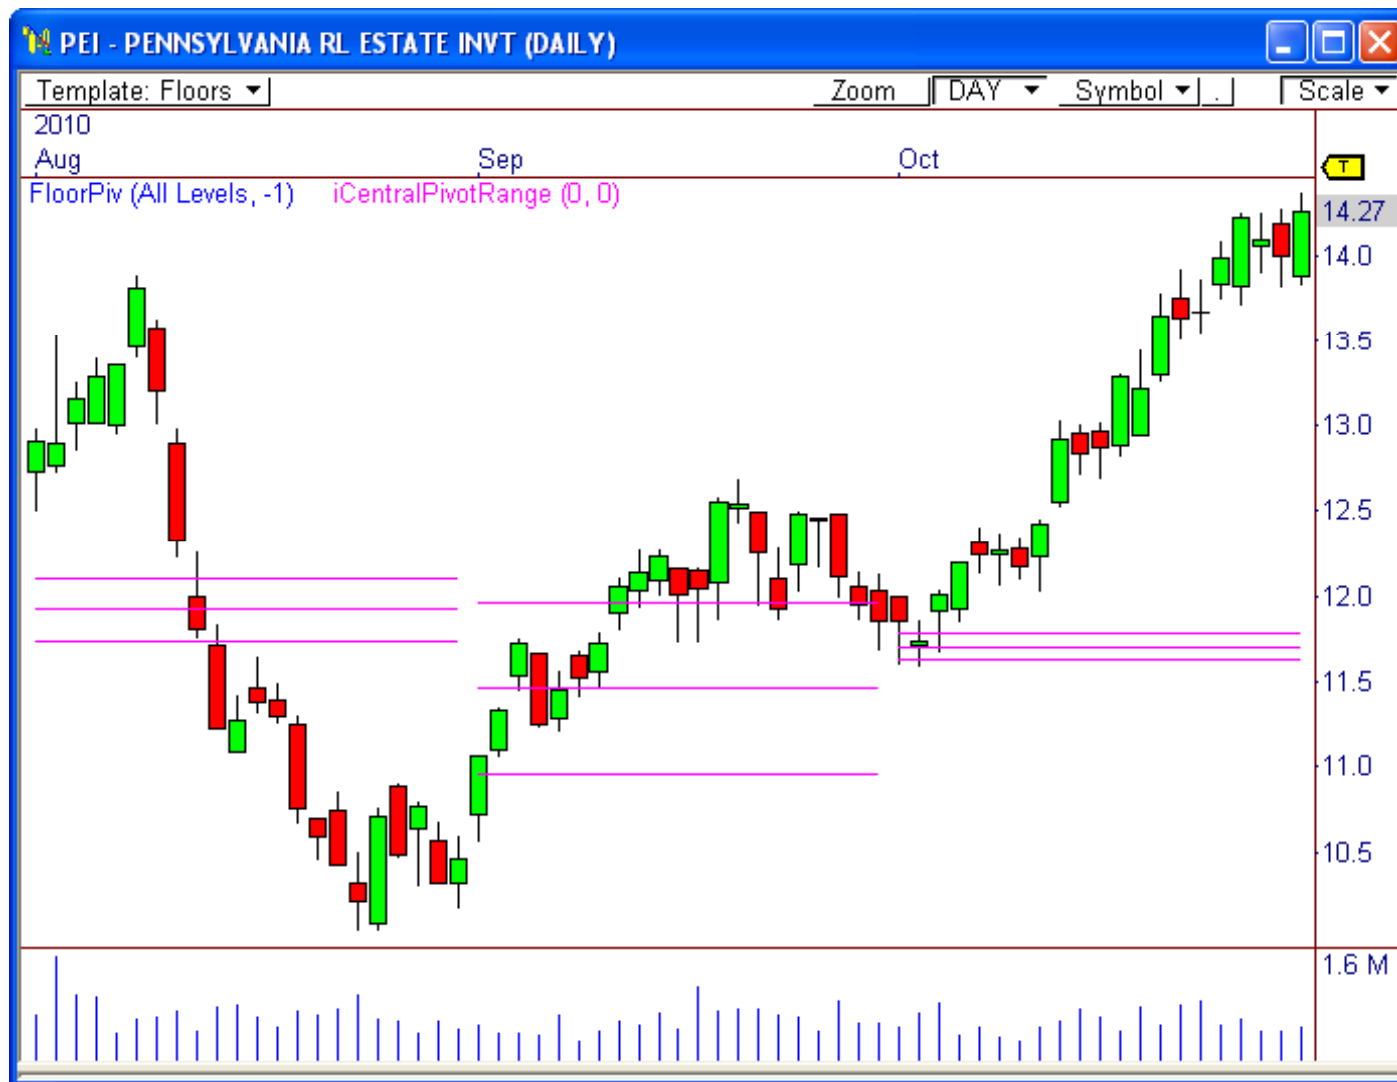

Result of the Setup

Inside Value Breakout

Inside Value Breakout

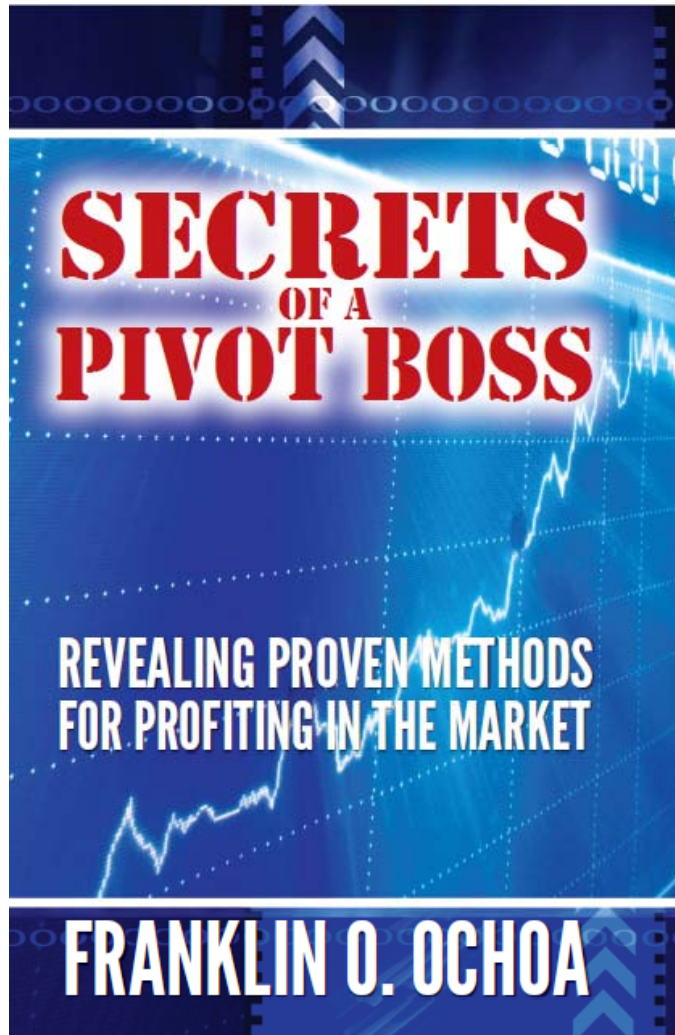

Trading with Discipline

- Use the pivots to develop a theory for market direction and behavior
- Identify the best entry and exits points before the market opens
- Let the market prove or disprove your theory
- Do your homework
- Trade with confidence and execute your plan
