WHY THE OPENING TRADE WORKS

Gap & Commit

ASX 200 gaps on open based on overnight US/EU futures — price must commit to direction.

First Candle Authority

The 10:00 AM 5-min bar establishes the daily bias that institutions defend for 10–20pts.

Institutional Order Flow

DE v4 signals align with large institutional orders placed at the ASX electronic open.

Tight Spread at Open

AU200 spread is tightest at open (~1pt), ensuring accurate fills and reduced slippage.

Directional Momentum

Markets commit to direction in the first 10–20pts before mean-reversion kicks in.
